

Start

Declare variables:
FLOAT *currentPrice*, *percentage* = 0.09,
discountValue, *finalPrice*

"Enter the original
value of the clothing"

Read *currentPrice*

$\text{discountValue} = \text{currentPrice} * \text{percentage}$
 $\text{finalPrice} = \text{currentPrice} - \text{discountValue}$

"The new price to pay is:" *finalPrice*

End
